

Strategies

for Sustainable Regulation
Competing Forces, Depleting Resources

25 & 26

May '09

Place : Best Western Premier Seri Pacific, Kuala Lumpur

Conveners : The Energy Resources Institute, India (TERI)
and leading experts

What Participants Will Learn:

- The institutions and processes shaping stakeholder engagement today
- The role of regulation in promoting equity, efficiency, quality and consumer satisfaction in the infrastructure sectors
- The concepts of economic, social and environmental sustainability in the infrastructure sectors and their potential benefits to industry and other stakeholders
- The role of government, regulators, industry and public in promoting sustainability
- The legal, financial, and technical tools for effective infrastructure regulation and the interface between regulation and competition

ABOUT

For the forward thinkers, the economic downturn is a chance not only to take stock but also to strategize and emerge as winners. Businesses are operating with a strong undercurrent of tight credits, energy, food and water shortage. The complexity of this operating environment must inform capacity building engagement.

This two day workshop is designed to equip participants with the tools to respond to increasing competition in the light of resource constraints. Navigating the regulatory landscape allows for a shift from reactive thinking to proactive engagement. A distinct competitive advantage emerges when the design and implementation of corporate strategy is cognizant of this underlying connection.

Mode of Learning:

The goal of this workshop is explore strategic and organizational solutions in facing the regulatory nexus. It intends to develop concrete and meaningful actions that will make sustainable development practices in regulation the norm rather than a special consideration. The workshop is designed to engage participants in a stimulated environment, drawing on case studies, lectures and toolkits.

About TERI India:

The Energy and Resources Institute (TERI), India, is a leading global institute working on developing dynamic and inspiring programs for finding solutions to global problems in the fields of energy, environment and current patterns of development. TERI's Regulatory Studies and Governance Division facilitates the strengthening of new and emerging forms of governance and regulation in infrastructure sectors such as electricity, water, oil and gas, coal, and transport.
