

ECONOMIC REGULATION & REFORM OF ELECTRICITY INDUSTRY

12 & 13 JUNE 2012 | SERI PACIFIC HOTEL KUALA LUMPUR

WORKSHOP OBJECTIVES

Electricity Network industries around the world have been subject to reform since the late 80s. The thrust of the reform process has been to increase operational efficiency through introduction of competition where possible and the re-regulation of aspects of the production chain that are subject to natural monopoly characteristics or market power.

The program is designed to introduce participants to electricity economic issues in a practical context of electricity industry reform, international best practice principles to guide the reform process and policies of economic regulation when regulating and reforming the electricity sector. The focus is to provide participants with a sound understanding of how the regulatory processes are structured to achieve the goals of supply electricity in an economic and reliable manner.

On completion of this program participants will have:

- an introductory session on basic economic concepts applied to electricity industry regulation,
- an appreciation of the best practice principles and policies of economic regulation,
- how reform of the electricity industry is pursued in different jurisdictions,
- the knowledge to develop strategies to better address and communicate key regulatory issues to regulators, policy makers and other stakeholders.

WHO SHOULD ATTEND

The Program is targeted to policy makers, regulators, academic community with an interest on energy industry, investors and representatives of industry and consumer groups who want to gain a better understanding of the principles and practices of economic regulation.
